

R on proxy server (Mac chapter)

- This README shows the procedures to run R (and RStudio) inside a proxy server (usually in universities and academics environments).

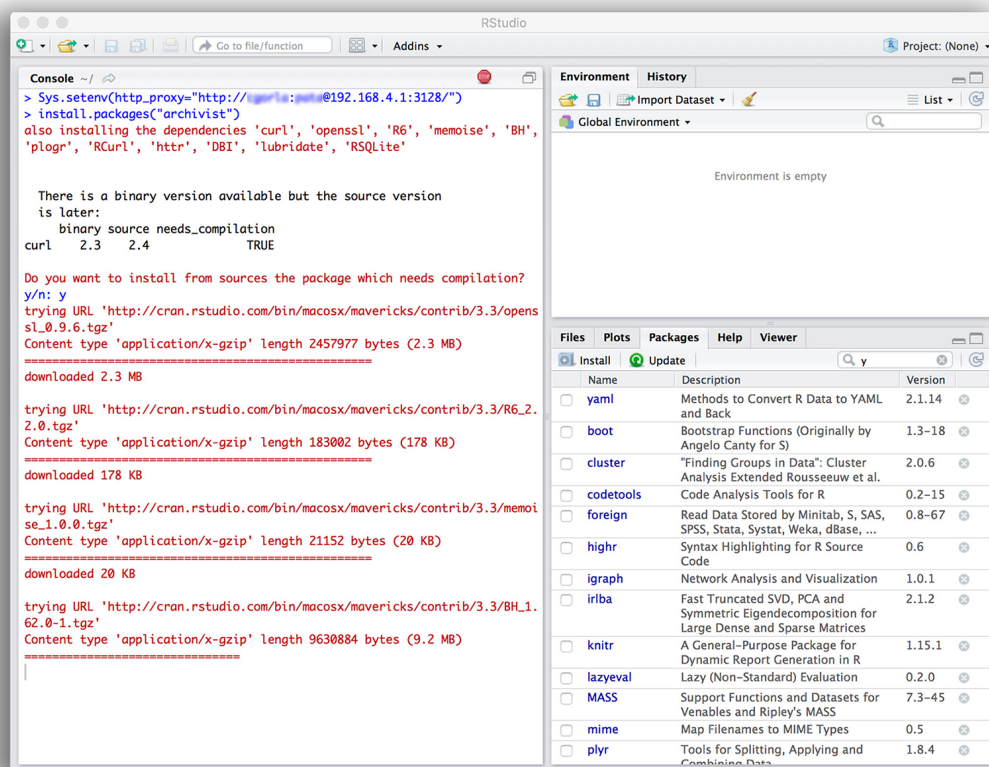

How do I get set up?

- Summary of setup:
 - Install software
 - Run it
 - Run script
- Software needed:
 - [R](#)
 - [RStudio Desktop](#)
 - Update to the latest version of R and RStudio to minimize incompatibilities.
- Software version (tests):
 - RStudio (Mac OSX version): 1.0.136
 - R (Mac OSX version): 3.3.3 GUI 1.69 Mavericks build (7328)
- Procedures:
 - Install [R](#)
 - Install [RStudio Desktop](#)
 - Previously, gather information about the configuration of your proxy server: IP address , port , username , password

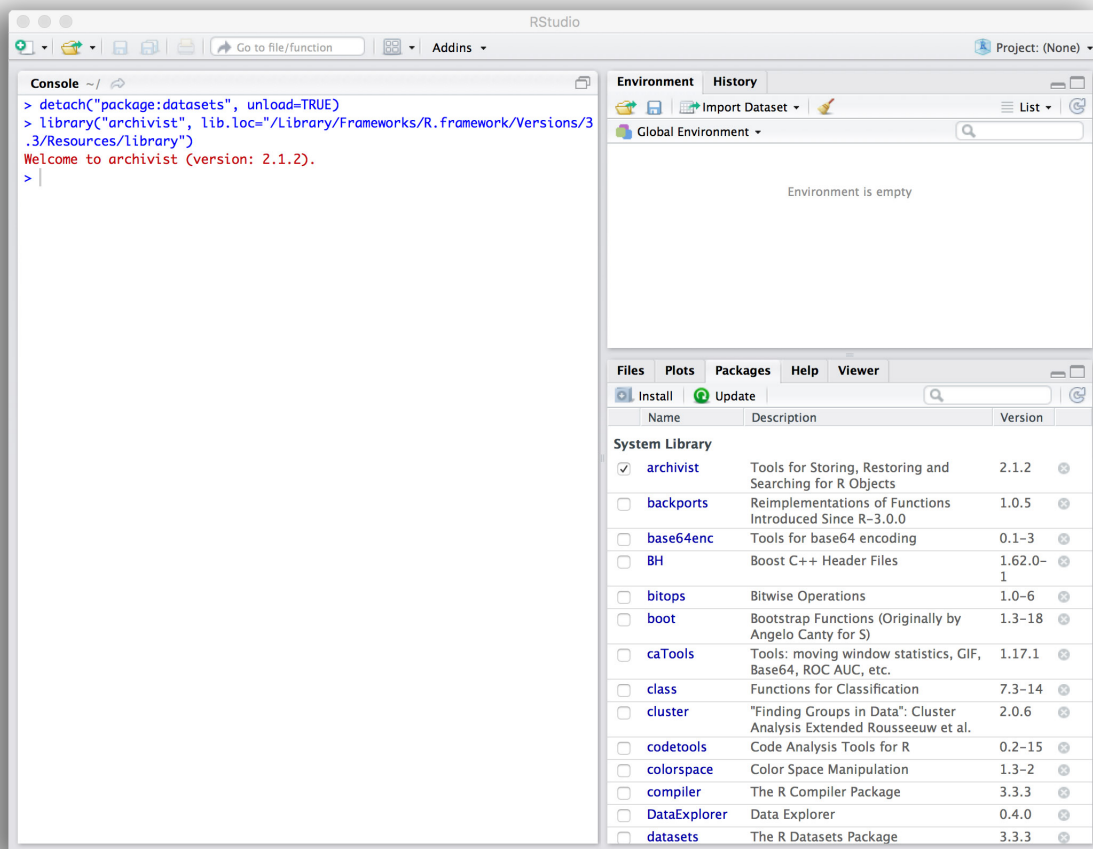

Mac OSX environment

- Deployment:
 - Run RStudio

- In the Console run this script:
 - `Sys.setenv(http_proxy="http://username:password@19X.16X.X.X:3XXX/")`
- where `username` must be replaced with your username; `password` with your password; `19X.16X.X.X` i.e. with this IP address `192.168.4.1` and `3XXX` i.e. with this port: `3128`
- Inside RStudio, click on the `Tools` menu, then `Install packages`. See below, installing the `archivist` package and all the dependencies involved.

- Once you download your `packages`, they will appear automatically in both software: RStudio and R.
- See below, the package `archivist` version 2.1.2 recognized.

R Package Manager		
<div> <div>< Back</div> <div>Fwd ></div> <div>Refresh List</div> </div>		
Status	Package	Description
<input type="checkbox"/> not loaded	RCurl	General Network (HTTP/FTP/...) Client Interface for R
<input type="checkbox"/> not loaded	RSQLite	'SQLite' Interface for R
<input type="checkbox"/> not loaded	Rcpp	Seamless R and C++ Integration
<input checked="" type="checkbox"/> loaded	archivist	Tools for Storing, Restoring and Searching for R Objects
<input type="checkbox"/> not loaded	backports	Reimplementations of Functions Introduced Since R-3.0.0
<input type="checkbox"/> not loaded	base64enc	Tools for base64 encoding
<input type="checkbox"/> not loaded	bitops	Bitwise Operations
<input type="checkbox"/> not loaded	boot	Bootstrap Functions (Originally by Angelo Canty for S)
<input type="checkbox"/> not loaded	caTools	Tools: moving window statistics, GIF, Base64, ROC AUC, etc.
<input type="checkbox"/> not loaded	class	Functions for Classification
<input type="checkbox"/> not loaded	cluster	"Finding Groups in Data": Cluster Analysis Extended Rousseeuw et
<input type="checkbox"/> not loaded	codetools	Code Analysis Tools for R
<input type="checkbox"/> not loaded	colorspace	Color Space Manipulation
<input type="checkbox"/> not loaded	compiler	The R Compiler Package
